According to the annual report on estimated accidents in the home, from Britain's Department of Trade and Industry and detailed in a June issue of New Scientist, three dozen people were sent to the hospital for injuries associated with teapot covers; about 165 for injuries from placemats, about 330 from toilet-paper holders, and about 13,000 from vegetables. However, sponge-related accidents fell from 996 the previous year to 787, and only 329 injuries from meat cleavers were reported. These ones are not as Useless. Everything you always wanted to know about humans, but were afraid to ask... Seventy percent of the dust in your home consists of shed human skin and hair...

One human hair can support 3 kg. The average human scalp has 100,000 hairs. Each square centimetre of human skin on the hand contains about 100 cm of blood vessels and 300 cm of nerve tissue. The tooth is the only part of the human body that can't repair itself. Every human spent about half an hour as a single cell. One human brain generates more electrical impulses in a single day than all of the world's telephones. The average human being will walk 160 billion millimetres in a lifetime. Human thighbones are stronger than concrete. Most tropical marine fish could survive in a tank of human blood. SOFTCORE!

WHAT DO YOU MEAN YOU DON'T OWN ONE OF THESE?

It takes the interaction of 72 different muscles to produce human speech.

ABOUT 36 MILLION PHONE CALLS ARE PLACED EACH DAY IN NEW YORK. 85,000,000 TONS OF PAPER ARE USED EACH YEAR IN THE US. 888,000 CREDIT CARDS IN CIRCULATION WILL TURN OUT TO HAVE INCORRECT CARDHOLDER INFORMATION ON THEIR MAGNETIC STRIPS. A FEMALE FERRET WILL DIE IF IT GOES INTO HEAT AND CANNOT FIND A MATE. A TYPICAL DOUBLE-BED MATTRESS CONTAINS AS MANY AS 2 MILLION HOUSE DUST MITES
